

How Does Hydration Station™ Improve Your Tan and Skincare Regime?

Created specifically for the tanning industry, Hydration Station combines pioneering science with time-tested botanical extracts to saturate tanned skin with moisture.

- Hydrated skin is essential for the life of your tan
- Steam opens pores for greater product penetration and absorption of nutrients
- Skin is cleansed naturally
- Deep hydration softens the skin
- Moisturization occurs deep in the skin for a noticeable 'baby soft feel'

Hydration Station Deluxe Marketing Package

Contains all the tools you will need to market your new system and maximize your profits!

- Three 16.9 oz Oxygen Science Concentrates incorporating blends of natural botanical extracts, minerals and essential vitamins
- Hydration Station Marketing Kit including images, sample press releases, client record forms and more

hydration station™

*A Rich, Beautiful,
Longer-Lasting Tan*

Prepare. Prolong. Protect.

The First Oxyhydrating Moisturization System for the Tanning Industry

The Unexpected Discovery

Hydration Station™ prolongs the life of any traditional or sunless tan. By deeply hydrating the skin, a faster and deeper tan is promoted. Skin will be left soft, supple and glowing!

Like many scientific discoveries and great inventions, the amazing skincare benefits of Hydrofusion™ and oxygen were unexpectedly discovered while searching for a different result!

Since 1998, the Sybaritic professional team of dermatologists, formulation scientists and bio-mechanical engineers has been developing an advanced 'cocoon-like' capsule. The 'cocoon' included the natural elements of sun, water, oxygen, heat, herbs, minerals and vitamins.

The research team observed that after sessions in the 'cocoon,' regular tanners and persons with tanned skin experienced a deeper-colored tan and skin glow.

The tanned subjects' extra sessions lead to the discovery and the revolutionary design of the Hydration Station.

A Longer-Lasting Tan!

Hydration Station™ Features

• Hydrofusion™

This unique combination of steam and radiant heat increases moisturization and product penetration. Hydrofusion's powerful vortex of energy can be used alone or separated into steam and radiant heat elements individually.

• Radiant Heat

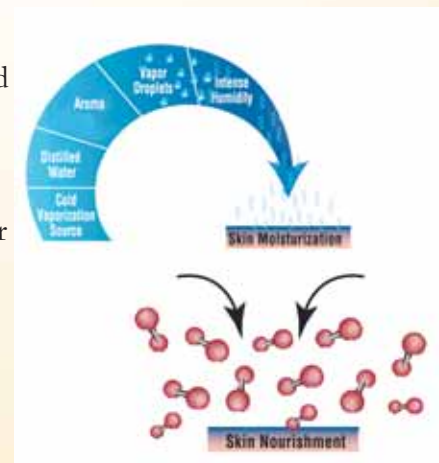

Radiant heat is a naturally occurring form of heat. It is the same healthy energy the earth receives from the sun. Radiant heat is absorbed by water and since the human body is made primarily of water, it is a natural catalyst for heat energy. Radiant heat helps to improve penetration of tanning and skin care products.

• Dense Steam

Dense steam is the fusion of two distinct elements: heat and moisture. Enveloped in a blanket of condensation, the body naturally absorbs moisture. The natural elements of steam open skin pores, enhance skin moisturization, and create a deeper and more even absorption of nutrients.

• Oxygen Science™

Oxygen Science™ Concentrates are added to Hydrofusion's steam vapor to hydrate the skin with vitamins, minerals and pharmaceutical grade botanical extracts to prepare, prolong and protect the life of your client's tan.

• Aroma System

The Hydration Station features a unique reservoir that vaporizes liquid vitamins, aromatic extracts and herbal extracts to awaken olfactory senses and enhance Hydration Station results. Pure essential oils and herbal extracts stimulate the senses. Powerful liquid vitamin concentrates and essential nutrients moisturize the skin when blended with steam.

• Color Spectrum Light System

The Hydration Station has six super-LED chromatic light stations that provide a rainbow of different shades including red, blue, green, jade, yellow, orange and violet. Each of the Hydration Station's pre-set programs features a color bath with color changes to relax, balance and energize your clients.

Additional Features:

- Vibratory Massage Bed
- Deluxe Color LCD Display
- Stereo-Ready
- Cool Facial Air
- Three Pre-Set Programs for the Ultimate in Tanning Skin Care

Hydration Station™ Advanced Skincare

Pick a Program, Pick a Product to Improve and Maintain a Deeper, Richer Tan!

Hydration Station features three pre-set programs you easily choose via the LCD touch control system.

Prepare Great for the beginning tanner, this program soothes the skin with moisture and prepares the skin for product penetration. **20 minutes.**

Prolong Perfect for the moderate tanner wishing to maintain his/her tan or those who are beginning to notice sun-induced changes in their skin. This program improves product penetration. **20 minutes.**

Protect Ideal for advanced tanners, this program incorporates the powerful vortex of Hydrofusion™ to improve the texture of frequently-tanned skin. **30 minutes.**

Oxygen Science™

Oxygen Science Concentrates are specifically formulated for tanners.

Every Hydration Station session includes the use of Oxygen Science Concentrates to drench the body in a delightful oxyhydrating moisturization bath.

They feature:

- Pharmaceutical-grade botanical extracts
- Powerful mineral extracts
- Liquid Vitamins A, C and E for active skincare

3 Unique Products...

• Mineral Melanin Concentrate

A tropical boost with coconut and tangerine. Contains: Malachite (Copper) Extract, Green Tea Extract, Dead Sea Mineral Salts and a blend of aromatic essential oils.

• Aloe Concentrate

A soothing blend of cooling aloe, cucumber and melon.

Contains: Aloe Vera, Copper, Algae Extract and a blend of aromatic essential oils.

• E and C Concentrate

An energizing blend of oils derived from vitamin-rich citrus fruit.

Contains: Tocopherol (Vitamin E), L-Ascorbic Acid (Vitamin C), and a blend of aromatic essential oils.
