

Product Overview: OxyOasis™ Advanced Oxygen Facial System

Size:

Length: 14.5"/36.8cm

Width: 15.7"/40cm

Height: 28.5"/72.4cm

Weight: 54lbs./24.5kg

What Is the OxyOasis System?

OxyOasis is a portable, self-contained oxygen generator and nebulizer. The unit utilizes ambient (environmental) air, filters out impurities and elements, and delivers oxygen for topical applications, utilizing Oxygen Botanicals™ skincare products and Syabritic's pure essential oils. The services provided with this system range from add-on services of 15 minutes to hour long advanced facials combining active ingredients and pure oxygen for dramatic results. Unlike competitor systems, OxyOasis was designed to be used with the Oxygen Botanicals skincare line to deliver oxygen to the skin through the system's applications and the skincare products applied. By using Oxygen Botanicals products, the technician creates specific customized formulations for every client, serving not only the most predominant skin type or concern a client faces, but a multitude of concerns in a single application. Each facial protocol provided implements oxygenated product applications and oxygen topical spray.

The Oxygen Botanicals skincare line is unique to all others in that it provides pure, non-chemically derived oxygen in each and every product both retail and professional. This product line does not rely on Hydrogen Peroxide to infuse oxygen, instead its unique catezome structure stabilizes the oxygen molecules, ensuring that drying and bleaching of skin does not occur as with traditional oxygenating approaches. Unlike the competition, the Oxygen Botanicals line offers both professional and retail products for improved and extended results and the added revenue of ongoing retail sales.

System Features:

- OxyOasis Spray
- Self-Contained System
- Patented, Proven & Reliable
- Unique, Customizable Protocols
- Low maintenance
- Light weight & Portable

OxyOasis Spray

The exclusive OxyOasis Spray feature supplies the skin with oxygen and targeted cosmetic ingredients. Many skincare concerns require a gentle yet effective solution. Following microdermabrasion, cosmetic surgery, laser resurfacing, and intensive peels, skin can be quickly soothed with oxygen spray facials. The unique OxyOasis Spray applicator allows for the simultaneous application of Oxygen Botanicals formulas and oxygen. The spray application of product and oxygen can also be used individually.

Tankless Oxygen... How Does It Work?

The compressor sends filtered ambient air to a group of valves, which allow compressed air to pass to the column in production. The columns contain a molecular sieve, whose function is to absorb the nitrogen and thus allow oxygen to pass. The oxygen-enriched air is then directed to a pressure-reducing valve through the flow control valve to the oxygen outlet fitting.

During this time, the column, which is being 'regenerated,' is connected to the ambient air and a current of oxygen-enriched air is passed through it. In this way, when one column is in production, the other is in a nitrogen desorption or "regeneration" phase. The oxygen-enriched air finally passes through a bacterial filter before being passed to the nebulizer hand piece.

Oxygen Botanicals Skincare Line Features:

- Oxygen Botanicals- a pure, non-chemically derived oxygenated product line
- Customize facials to serve any client and multiple concerns
- Oxygen Botanicals Professional Products deliver oxygenated customized facials
- Oxygen Botanicals Retail Products offer comprehensive at-home care, a natural extension to results & additional profitability
- Water-based line
- Non-chemically derived and oxygen-infused
- Time released formulas
- Natural botanicals
- Pharmaceutical grade ingredients
- Non-synthetic fragrances

Cost per Session:

\$10-\$15.00 per 45-60 minute protocol

This cost includes Oxygen Botanicals product and disposables used during protocols

Average Retail Cost of Facial:

\$90-120.00 per facial

Menu Suggestions:

1. **"Take a Deep Breath" Rejuvenation Facial: 45-60 minute protocol**
Retail Cost: \$120.00
- A complete facial for rejuvenation and freshening
2. **Sooth & Diminish Oxygenated Eye Facial: 20 minute protocol**
Retail Cost: \$45.00-60.00
- Freshen and awaken tired skin around the eye
3. **"Breathe Easy" Post-Peel Facial: 30-45 minute protocol**
Retail Cost: \$ 90.00-100.00
- Soothe and calm skin following more invasive services
