

SkinBella™

Particle-Free Dermabrasion

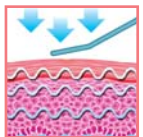

is a comprehensive skin rejuvenation system - a technological advancement in skincare utilizing particle-free dermabrasion to evenly exfoliate, deeply moisturize, increase circulation and counter the effects of hyperpigmentation. Exfoliate, balance and even skin tone for smooth, glowing, radiant skin!

SkinBella™ Offers Four Advanced Aesthetic Functions

Step 1... Exfoliate
Uncover new skin, smooth and soft to the touch!

SkinBella's **Exfoliation Function** produces a highly effective exfoliation. Dead skin cells, excess oil, and cosmetic residue are removed and pores are cleared resulting in deeply cleansed, smooth skin.

Step 2... Moisturize
Pamper & moisturize dehydrated skin!

After performing SkinBella's Exfoliation Function, skin is soothed and hydrated with the **Moisturization Function**. This additional function boosts hydration levels and deeply penetrates serums to help alleviate your dry skin concerns.

Step 3... Energize
Energize skin for a fresh, vibrant glow!

SkinBella's **Invigoration Function** energizes pale, waxy complexions leaving skin glowing and pink.

Step 4... Clear
Even and smooth skin tone!

SkinBella's **Clearing Function** takes balancing to the next level resulting in brilliant skin tonality. Accumulations of pigment and minor scarring due to blemishes can be smoothed and evened through a series of SkinBella sessions.

Before and after 5 weeks of treatment.

Before and after 4 weeks of treatment.

SkinBella Advantages

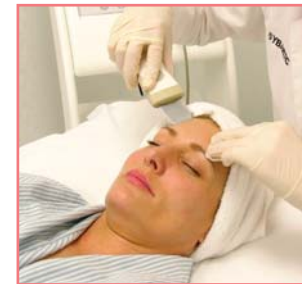

- Non-invasive, only removes the stratum corneum.
